

# Hollister

Construction Company

## About Us

Our core business is construction of office, industrial and retail facilities for commercial entities and government agencies.

Our residential department builds affordable units, transitional housing and shelters for low income families and seniors.

Our service department manages maintenance and repairs for commercial clients throughout the west coast.

## Core Values

Our mission is to provide professional construction services at market prices with integrity. We achieve our goals by delivering results which builds long term relationships from satisfied clients and repeat business.

This is accomplished through our **Key performance indicators:** Price, quality, attention to detail and adherence to schedules. We contribute to the environment through our polices and the economy through diversity while insuring safety for all parties.

**Sustainability:** We have been building green since 1992. We suggest products that decrease operating cost and increase the life cycle of the building. We insure use of low VOC products and utilize renewable materials when applicable.

During construction we implement practices to reduce waste and pollution through reuse and recycle of existing materials.

**Diversity:** We believe that diversity contributes to the success of a project as it enhances our resources, affords opportunities for others and can reduce the overall project cost.

**Safety:** We value safety of the entire work force. Through a site specific plan, IIPP, continuing education and third party inspections we continue to met our commitment to remain accident free. (EMR: 100%)
